

Definition of Approved, Continued Review, and Not Approved

- Approved: Protocol meets all IACUC and federal requirements and may proceed as written.
- Continued Review: The IACUC requires a written response regarding the suggested modifications or assurances to continue review of the protocol by date . Principal investigators may not proceed until the IACUC reviews and approves the additional information requested and forwards an approval notification.
- Not Approved: Protocol does not meet IACUC and federal requirements. Committee will provide suggestions to the principal investigator. A new protocol must be submitted for IACUC review by date . Based on IACUC review, the principal investigator will be notified of approval or the need for additional information.
